

Gibo/Kodama
 CHAIRS

The Respon 6000 Special Task Chair features a waterfall seatpan and a distinctive, supporting back.

Its Independent Tilt Control with ratcheting back makes the Respon 6000 the most easily adjustable of our production chairs, allowing each user to take full advantage of the built in lumbar support and ergonomic adjustments.

The Independent Tilt gives you independent control of both seat and back angles. The standard seat height adjustment rounds out the full range of ergonomic adjustments.

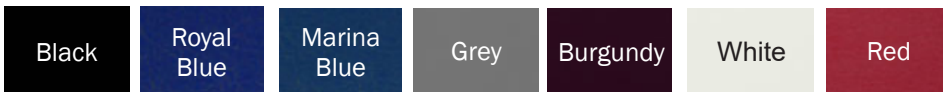

The Respon 6000 has become a staple at many local and federal government facilities, and it may be a great fit for you, as well.
