

### Description

Sticky mat frames provide a movable base for mounting adhesive floor mats without the limitations of mats secured directly to the floor. CleanPro® aluminum sticky mat frames expand the applications where floor mounted sticky mats are either inconvenient or impossible, such as carpeted, concrete, grimy, oily, damp or temporary walkways. Likewise, the anodized aluminum frame and polyethylene center improves pass-through and prevents upheaval when using roller carts, removing film layers, or when refreshed mats are extra tacky.

The material construction provides an inert and non-contaminating solution for foot and cart traffic at cleanroom entrances, offices, warehouses, manufacturing sites, hospitals, construction sites and more. CleanPro®'s wide assortment of sticky mat frame sizes grant greater flexibility and minimal interference when your location or application changes.

### Features

- Composed of anodized aluminum, with a polyethylene center where the mat installs
- Inert and non-contaminating material construction
- Prevents folding, upheaval, deforming, and movement of sticky mat during high volume foot or equipment traffic
- Improves efficacy of sticky mats on surfaces that resist adhesion such as carpets, concrete, grimy floors, or temporary walkways
- Movable base is relocatable for cross-functional use or during cleaning procedures
- Fits wide range of standard adhesive floor mats from 18" x 36" up to 36" x 45"
- Applications include cleanrooms, laboratories, offices, hospitals, manufacturing, distribution, and construction sites
- Low 3/16" profile and non-skid backing layer allow easy rolling movement of carts and other equipment
- Made in the USA

### Ordering Information

Part Number	Frame Dimensions	Fits Mat Size
CSF-1836	24" x 42"	18" x 36"
CSF-1845	24" x 51"	18" x 45"
CSF-2436	30" x 42"	24" x 36"
CSF-2645	32" x 51"	26" x 45"
CSF-3636	42" x 42"	36" x 36"
CSF-3645	42" x 51"	36" x 45"
