

## PGC-821 Garment Clips

These useful plated steel clips were designed in accordance with ESD Association Standard Test Method ESD STM2.1 Garments. Attach them directly to a garment's sleeves or hem for making either evaluation or audit resistance measurements. These unique clips are designed for simple connection to a resistance measurement instrument via banana input receptacles.

Clip flanges are insulated to provide electrical isolation when making measurements.

### Specifications

<b>Dimensions:</b>	1" x 2" (2.5 cm x 5.0 cm) Electrodes mounted to an electrically conductive clamp
<b>Electrode Material:</b>	Plated Steel
<b>Test Lead Connection:</b>	Brass, Nickel Plate conductive Banana Jack
<b>Clamp Insulation:</b>	Rubber Grommet measuring $> 1.0 \times 10^{12}$ Ohms over a Heavy Duty Rubber Coating
