

Botron common point ground is designed to have two workers be able to plug into on ground point and be at the same potential. The B9702 is easy to install simply snap the end of the common point ground into the 3/8" f-male snap on the mat. The B9702 comes with a one megohm resistor to protect the mat and two banana receptacles in front of B9702. A 310 ring is at other end and the wire is 10' long. Check with your facility people on were to ground the unit. **Disclaimer.** All statements of technical information are believed to be true and are based upon tests we believe to be reliable. The proper use and application for this product must be the responsibility of the user. The statements herein shall have no force or effect.

INSTALLATION:

- Unroll wire
- Screw onto underside of bench
- Plug banana from straps
- Ground per your facility people
