

SPECIFICATION SHEET

CleanPro ASCR-33

- Description:** The CleanPro ASCR-33 is a HEPA vacuum operated shoe cover remover that is intended for medium to high-volume use. The remover interface is made of stainless steel, power coated steel, and ABS plastic. The HEPA vacuum and 33 gallon interceptor components are powder coated mild steel and connected by plastic vacuum hose. The momentary vacuum ON switch is integrated into the safety handlebar and sends an RF signal to remotely turn the suction on from up to approximately 250 feet away.
- Materials:** Stainless Steel, Powder Coated Mild Steel, ABS Plastic
- Weight:** All components combined weigh approximately 120 lbs.
- Shoe Covers:** Holds 600+ shoe covers, depending on type and compaction
- Dimensions:** Remover: 29" l x 13" w x 35.5" h (with handlebar)
33 Gallon Interceptor: 40" h x 19" diameter
Vacuum: 23" h x 13" diameter
- Power Source:** 120v standard wall outlet
AAA batteries for the RF signal transmitter (~10 year life)
