

**M**egaClean Heavy-Duty Cleaners are a solution that offers an effective alternative to toxic and flammable solvent-based cleaners such as acetone and isopropyl alcohol. Original MegaClean non-flammable, bio-degradable formulation is an ideal spot cleaning solution that easily removes grease, photoresist stains and adhesives, such as tacky mat residues, from most surfaces.

The New MegaClean CT detergent is a low-sudsing, high temperature detergent originally designed for sonic baths and spray applications. Highly effective on slurries and residues, it contains corrosion inhibitors for use with scrubbers.

- Filtered to 1 micron
- Non-flammable
- Bio-degradable
- Water soluble
- Effective at low concentrations

### Suggested Use and Dilutions

**Heavy-duty cleaning:** use a 50% or greater concentration

Suggest 3 to 5 minute dwell or immersion time.  
Will require production quality water or IPA rinse.

- Photoresist stains
- Slurry or graphite removal
- Removal of flux from circuit boards
- Ultrasonic baths
- Parts, bearings
- Scuff marks

**Medium to heavy cleanup:** use 10 to 25% concentration  
Will require production quality water or IPA rinse

- Lens
- Floors
- Spot Removal

## SPECIFICATIONS

**Material:**

1 micron filtered detergent and degreaser

**Container:** HDPE

**Sizes:** 1 quart with spray pump  
1 gallon container  
5 gallon pail

Manufactured for use in Controlled Environments

- ISO 5 thru 9 Cleanrooms
- ISO 9001 Certified Manufacturing Facility
