

EasyBraid

WickGun™ Dispenser combines the capability of desoldering braid with the convenience of a hand tool

- A simple one-handed operation dispenses, positions, and cuts off braid.
- No waste or contamination when using the WickGun™ Dispenser. Braid can be retracted and cut exactly at the point where solder ends. Solderability is enhanced because braid is not contaminated with finger oil or other foreign debris.
- Available with replaceable / interchangeable cassettes. See the four types of Desoldering Braid and five sizes below.
