

Description

CleanPro® heavy-duty, 55gsm shoe covers combine durability and cleanliness with outstanding anti-slip and anti-skid properties, providing unmatched performance and value.

These cleanroom shoe covers are constructed of polypropylene laminated with a polyethylene film, and are low-shedding to keep environments clean. They are worn over personal footwear to prevent workers from contaminating the environment, and to protect footwear from incidental contact with hazardous and non-hazardous substances.

Product Features

- Polypropylene with Polyethylene Film
- 55 gsm Thickness
- Non-Slip textured surface for safe walking
- Elastic Closure
- Serged Seams
