The Citrus Series

A FRESH TAKE ON MED-TECH SEATING

Introducing Citrus, a Med-Tech seating option that doesn't force you to choose between style and performance. Simple, fresh, and clean modern design with an intuitive Flex Function that lets the chair adapt to each individual user with no adjustment necessary.

Hospitals, nursing stations, technical labs, research facilities and universities continue to evolve and advance. Citrus is a chair capable of evolving with these spaces and it's performance excels in demanding Med-Tech environments.

A design that adapts to each individual user. A design that incorporates vibrant color into the workplace while blending in seamlessly. And a design built to withstand the rigorous demands and standards of its environment. Citrus is a fresh take on what to expect from Med-Tech seating.

Simple. Performance.

The best adjustments are the ones you don't need to make.

Innovation sometimes means less is more.

Citrus' revolutionary Flex Function technology is at the heart of this advancement in comfort and support. It allows the chair to adapt to user movements while leaning backwards or turning to either side, providing optimal support in any seating position.

In addition, the Flex Function on the forward edge of the seat supports forward-angle seating - precisely the type of posture typical in Med-Tech environments.

Flex Function

The Flex Function seat and back adapt and auto-adjust to individual user movements

Forward Edge

The flexing forward edge also accommodates forward leaning working positions, preventing pressure while ensuring proper blood circulation

One-Touch Height Adjustment

The only user-made adjustment necessary

Extra-Thick Upholstery

Adds comfort, providing a stable yet supple seat

Easy Mobility

The light construction and intuitive back handle allows the chair to move with ease

Built for Med-Tech

The ideal Med-Tech chair doesn't just protect the sitter. It also protects the setting. Citrus has been designed with lab-grade hygiene in mind, combining materials, form and design to create seating with the properties necessary for lab and clinical healthcare workspaces.

Anti-Bacterial Upholstery

Leatherette and PU-foam options with significant anti-germ properties

Cleanroom Suitable

For use in Category-3 cleanrooms, in accordance with ISO 14644-1 (FS209E Class 1)

ESD Compatible

Meets ESD STM12.1-1997

Easy-Cleaning

Minimal joint hygienic design for easy cleaning and disinfection

Disinfectant and Chemical Resistant

Resistant to standard disinfectants and chemicals per ISO 2813

Biotech Suitable

Adheres to laboratory level BSL1, BSL2 and BSL3 of the Directive for Biological Agents

TUV-Certified

For optimal levels of safety

Robust Polyamide Backrest

Extra durable polyamide backrest holds up to demanding Med-Tech environments

Make it Fresh Keep it Clean

One guiding principle in the design of Citrus was to make the most of the fewest parts possible. The result is a chair without a confusing array of knobs and levers, but instead a clean, minimalist look. And now you can add a touch of personality with your choice of optional vibrant colors.

We believe the seating in Med-Tech spaces should compliment the progressive, exciting workspaces they inhabit. Citrus brings fresh, clean design to modern technical spaces.

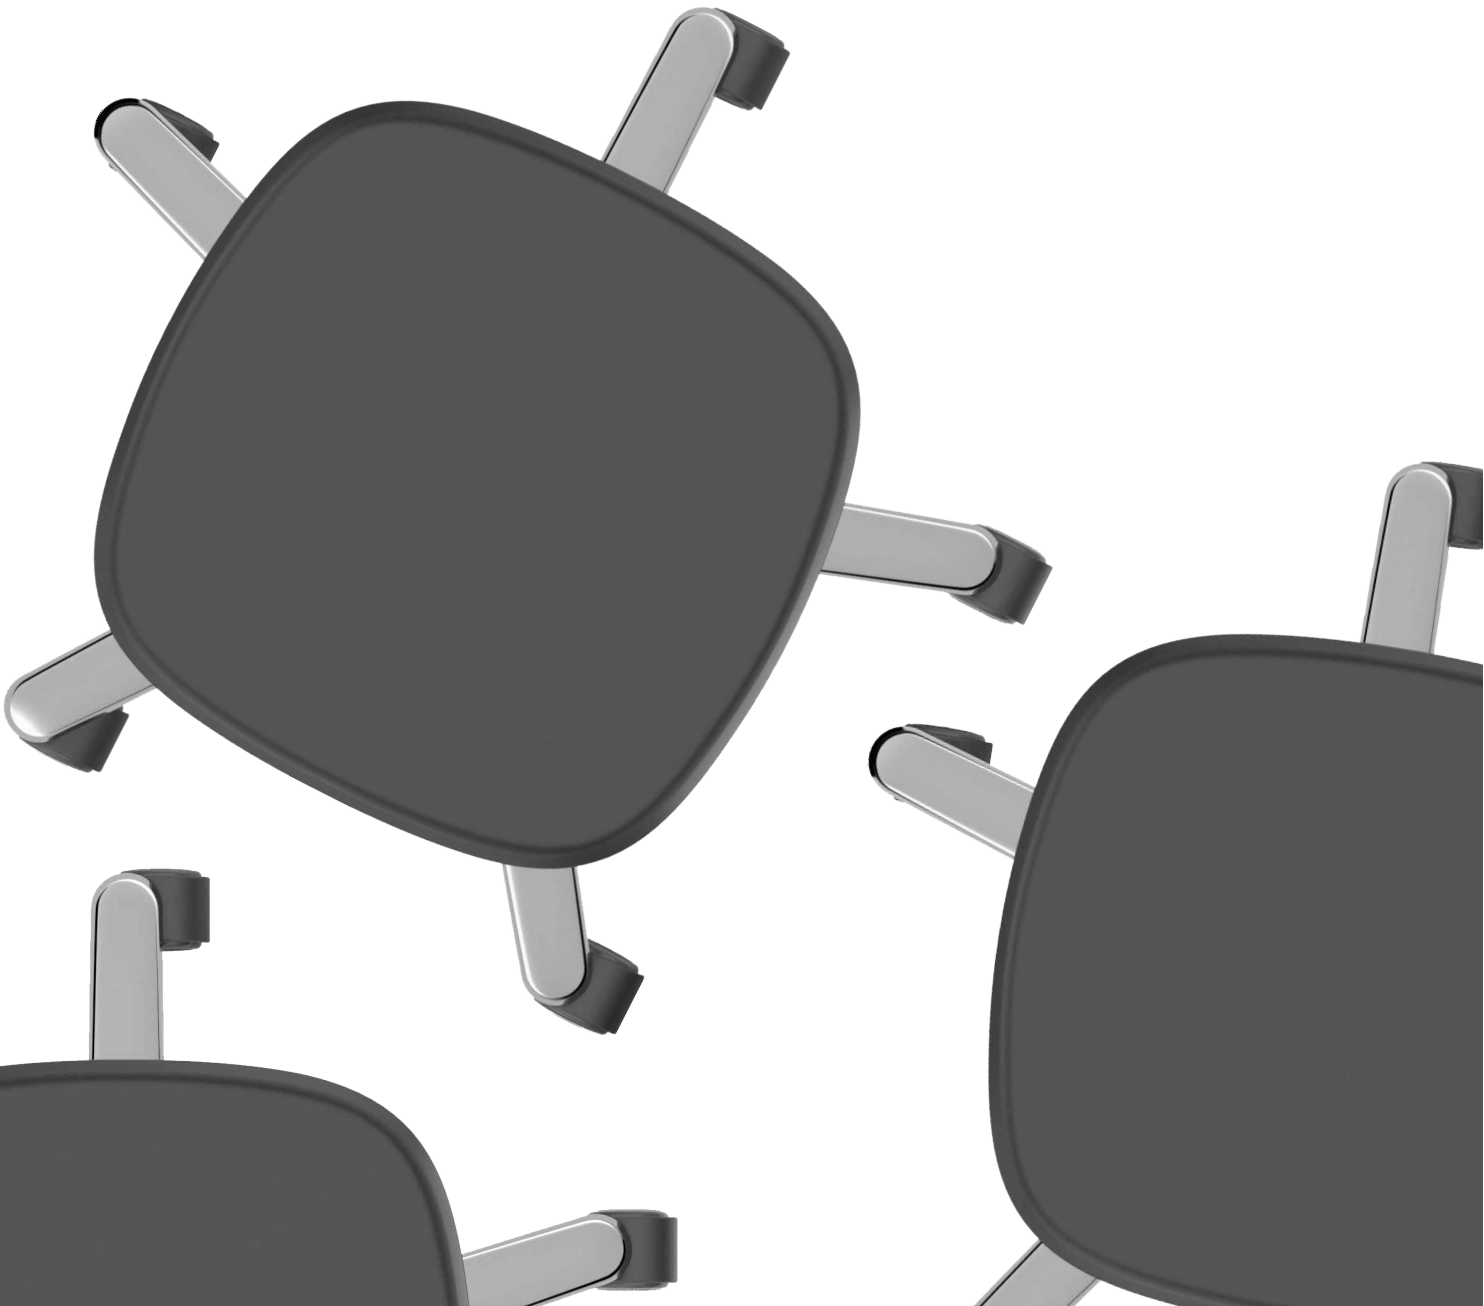

Uncomplicated Flexibility

Citrus is available in both chair and 360 stool designs. With a cleanable, durable and comfortable PU foam the Citrus stool is a simple and uncomplicated seating solution for healthcare and laboratory environments.

Purposeful Design

The surface of the seat is designed to offer maximum utility. The unique shape allows users to sit comfortably along the long edge, or perched on a corner.
