

# Vision-Lite®

SHADOWLESS FLUORESCENT MAGNIFIER

*The Perfect Inspection Tool for the Machining Industry*

In a World of Copycats and Knockoffs, Vision-Lite® is a Groundbreaker.

72400-B  
(Shown in Carbon Black)

This excellent inspection tool is perfect for the machining industry. If you are inspecting polished metal components, exotic materials, or if inspecting surface quality are key to your job, the **Vision-Lite®** has no equal. The unique 3-sided bulb offers soft, shadowless illumination that will make even the smallest details stand out.

One of the key design features is the **ONLY TRUE RECTANGULAR LENS**. All other manufacturers who advertise 'rectangular' magnifiers are only telling you half the truth. What they are offering is a round lens, with two sides cut flat. You still get edge distortion, and other less desirable optical effects from this. With **Vision-Lite®** you can get the same level of clarity side to side. *We dare you to compare!*

## FEATURES:

- Shadowless Wrap-Around T5 Bulb for Uniform Lighting
- 7.5 x 6.25" Crown White Optical Grade Glass for Highest Resolution Images
- 3 Diopter Standard (1.75x)
- Available in Shadow White or Carbon Black
- Heavy-Duty Arms Made of High Strength Extruded Aluminum Design for Ultimate Precision & Holding Power. Choice of 30" and 43" Reach
- Table Edge Clamp and other Mounting Choices
- ESD Safe and RoHS Compliant
- 5 Year Mechanical Warranty... **Best in the Business!**

## SPECIFICATIONS:

All part numbers below are for Shadow White finish. Add (-B) for Carbon Black finish.

Part Number	Arm Reach		Magnification 3 Diopter (1.75x)	Mounting Style		
	30"	43"		Screw Down	Table Edge Clamp	Weighted Base
71300	✓		✓	✓		
71400	✓		✓		✓	
71600	✓		✓			✓
