

The StatIQ Band SB100

- ▶ The World's first wearable wireless body voltage monitor, accurate within 10V!
- ▶ Audible alarms when threshold exceeded or ESD events occur (as low as 100 V discharge).
- ▶ Mobile app to visualize voltage data and change parameters on the StatIQ Band such as alarm thresholds and volume.

Applications

- ▶ Monitoring and assessment of existing personnel ESD mitigation systems.
- ▶ Tether-free identification of potential ESD damage to electronics.
- ▶ Protection from ESD ignition events in hazardous chemical environments.

Product Info

- ▶ Designed and manufactured in Colorado, USA.
- ▶ Developed by Engineering PhD founders after years of data driven research on electrostatic measurements.
