

DESI PAK™, SORB-IT™, AND TRI-SORB™

Moisture protection solutions for the healthcare industry

Safeguarding healthcare products

Clariant offers desiccant packets and bags that adsorb moisture inside packages and sealed containers that hold pharmaceutical, nutraceutical, medical products and devices. By adsorbing moisture, these desiccants prevent moisture-related damage while helping to preserve product efficacy and shelf life. Smaller desiccant packets are sized to protect the contents of individual pharmaceutical bottles and product packages, while larger desiccant bags protect bulk packages of pharmaceutical products and ingredients.

Advanced desiccant solutions: Desi Pak™, Sorb-It™, and Tri-Sorb™

Clariant's pharmaceutical desiccant packets and bags feature Sorb-It™ silica gel, Desi Pak™ bentonite clay, and Tri-Sorb™ molecular sieve desiccants. These desiccants are sealed into porous packets or bags, which are constructed using FDA- and EU-compliant film material, customizable to customer requirements.

Preserving your products' integrity and performance

Exposure to moisture or high humidity can damage or degrade pharmaceutical and nutraceutical products, reducing the shelf life or potency of tablets, capsules, and powders prior to consumption. Many types of medical devices, diagnostic equipment, medical testing kits, and medical electronics must be kept free of moisture to function properly following periods of storage, shipment, or retail display.

Availability

Our desiccant packets and bags for pharmaceutical applications are manufactured in Turkey and are readily available worldwide. In addition, we offer alternative solutions tailored for nutraceutical, healthcare, and personal care applications, ensuring comprehensive moisture control across various sectors. For detailed information on product availability and to discuss your specific requirements, please do not hesitate to contact our team.

Configurations

Individual packets of Sorb-It silica gel, Desi Pak bentonite clay, and Tri-Sorb molecular sieve desiccants are available in sizes ranging from 0.50 to 10g. Bulk bags of these desiccants are also available in sizes from 100 to 500g. Packets and bags are constructed of sealed, breathable FDA- and EU-compliant film material and can be specially configured to meet customer requirements.
